

MUNNAM SATEESH

Java Full Stack Developer | Software Engineer

Hyderabad, India | 7675811508 | munnamateesh3@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Java backend engineer with 4 years of experience designing and building secure, scalable applications using Java 17, Spring Boot, and microservices, with strong unit testing practices using JUnit. Full-stack capable across React and Vue.js. Delivered production systems for enterprise utility clients (Florida Power & Light / NextEra Energy) with a focus on REST API design, cloud deployment on AWS, and reliable, well-tested releases.

TECHNICAL SKILLS

Languages & Core Java: Java 8, Java 17, OOP, Java Collections, Stream API, Lambda Expressions

Backend & Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Microservices, Hibernate, JDBC, REST APIs

Frontend: React, Vue.js, TypeScript

Databases: MySQL, MongoDB

Cloud & DevOps: AWS, Splunk, GitHub, Bitbucket, SonarQube

Testing & Tools: JUnit, Vitest, Selenium, Postman, Jira

Identity & Auth: Azure Entra ID (Azure AD), MSAL

PROFESSIONAL EXPERIENCE

INU Technologies — Full Stack Developer

Mar 2026 – Apr 2026

Project: Internal Product – AI Resume Intelligence Platform (HR Tech / Recruitment Automation)

- Designed and developed a full-stack AI-powered resume intelligence platform using React (TypeScript) and Node.js (Express) to automate resume parsing, duplicate detection, and semantic job matching.
- Implemented secure authentication using Azure Entra ID (Azure AD) with MSAL for organization-only access.
- Integrated Azure OpenAI (gpt-4o-mini) for AI-powered resume parsing, semantic job description matching, and intelligent duplicate detection.
- Designed MongoDB schema for candidate profiles, resume metadata, and AI analysis results, using Drizzle ORM for type-safe database interactions.
- Built advanced filtering, search, and an analytics dashboard for candidate management; implemented bulk resume upload and backend file processing.

Full Stack Developer — Florida Power & Light (NextEra Energy)

Jun 2024 – Present

Technologies: Java 17, Spring Boot, Vue.js 3, AWS, JUnit, Vitest, Splunk

Assist Portal | Jun 2025 – Present

- Developed backend services in Java 17 / Spring Boot supporting assistance program workflows and partner agency access.
- Built dynamic Vue.js frontend modules for training materials, community resources, and support documentation.
- Implemented secure authentication and role-based access control for agency representatives.
- Maintained high test coverage using JUnit and Vitest to ensure stable production releases; contributed to scalability and performance tuning for high-traffic utility platforms.

Streetlight Management Portal | Dec 2024 – Jun 2025

- Designed and developed REST APIs in Java 17 / Spring Boot to support streetlight outage reporting and service tracking.
- Implemented user interfaces for outage reporting, new installation requests, and repair status tracking.
- Implemented centralized logging and monitoring using AWS Splunk for proactive issue resolution; optimized response time and system performance.

Medical Essential Service Program (MESP) | May2023 – Dec 2024

- Developed scalable RESTful backend services using Java 17 and Spring Boot; built responsive frontend components with Vue.js 3.

- Implemented comprehensive unit testing with JUnit (backend) and Vitest (frontend), improving code coverage and reliability.
- Integrated AWS Splunk for logging and monitoring, enabling faster issue diagnosis for critical medical-essential customer support systems.

Junior Software Engineer — Central Hudson Gas & Electric

March 2023 – Jun 2024

Customer Web Applications Technologies: ASP.NET Core, Web API, MVC, Vue.js, TypeScript, SAP OData

- Contributed front-end enhancements using Vue.js and TypeScript and coordinated with backend teams to resolve API and data integration issues via SAP OData.
- Managed customer-reported incidents through ServiceNow and tracked tasks/defects in Jira under Agile methodology, ensuring high application reliability.

AvenData Technologies — Full Stack Developer

Aug 2022 – Dec 2022

- Built a new MVC application and centralized database for a new product; developed and maintained Selenium automation scripts (C#) for end-to-end testing.
- Performed end-to-end testing, defect reporting, and fix recommendations across the development team.

CERTIFICATIONS

Full Stack Developer Certification – Digit Institute, Hyderabad
